

◆ PRODUCT INTRODUCTION:

The pilot ladder is a special ladder that helps the pilot board the ship. Pilots perform rudder control, debug communication equipment, inspect ship equipment, and guide ships into and out of ports. Our pilot ladder complies with SOLAS standards and is safe and reliable.

Pilots are key personnel in ship navigation, and their safety is closely related to navigation safety. We need to provide them with better protection and improve the overall safety level of the shipping industry.

◆ TECHNICAL PARAMETERS:

1. The bottom four pedals of pilot ladders use steel-lined rubber pedals
2. The size of the longest stop bottom pedal: 1800* 115* 28mm
3. The upper and lower parts of side cables are tied smoothly and firmly, and the diameter is 22mm.

Scope of application: Ladders for pilots to safely leave or board the ship
Comply with SOLAS1974 and its latest amendments

Pedal material: hard beech

Type: RSPLS

Step Spacing: 330±20 mm

Material & Diameter of Side Rope: Manila rope

Certificate: CCS/EC
